

# **ECC BIRD BALLS**

**THE PERFECT SOLUTION TO CAMOUFLAGE OPEN WATER  
PONDS AT AIRPORTS FROM WATERFOWL**

**ECC BIRD BALLS ARE FULLY OPERATIONAL AT AIRPORTS  
ACROSS USA & CANADA**

What are they ? Bird Balls are 100mm diameter UV stabilized black hollow plastic balls, manufactured in High Density Polyethylene. The balls float on the surface of a liquid, automatically arranging themselves into a close packed formation to completely cover the liquid surface.

- Simple to install
- Maintenance free
- Proven track record with US dept of Fisheries & Wildlife
- UV stabilized HDPE, with over ten years life expectancy
- Accommodates
  - Changes in liquid levels
  - Floating platforms
  - Aerators
